(P.T.O.) For further details.

Requirements:

[https://www.amplenote.com/bounty\\_plugins](https://www.amplenote.com/bounty_plugins)

 **Markdown-backed Graphing Utility**

Set up a plugin with a selector to choose from different headings in a note. When a heading is chosen, the plugin will render a configurable graph of the data in the table(s) that reside within the chosen header.

The row/column labels of the table should be used within the graph, if available. A button in the plugin can resync the data table with the visual output.

**Bounty:** \$750

**Progress Notes:** Nobody is known to be working on this as yet. If you are working on this and have a release date in mind, email us?
